

I will create the back-end from my Master Of Cravetion restaurant website. I will create Menu Items via Pick-Up or, Deliver or, or Reserved-in-Person, T-shirts Items via Pick-Up or, Delivered or, Reserve-In-Person, Customers, CreateNewRecipesFromCustomers, Comments Menu, Comment T-Shirt, Comment Website, Comment Other.

I will write /menu-pick-up, /menu-delivered, /menu-reserve-in-person, /t-shirt-pick-up, /t-shirt-delivered, /t-shirt-reserve-in-person, /comment-menu, /comment-t-shirt, /customer, /comment-website, /comment-other, /createnewrecipesfromcustomers for each path with the responses to the most common HTTP methods of GET, PUT, POST, DELETE.
